SUMMARY

Mobile & Backend Developer with 6+ years of experience building and launching production-ready Android, cross-platform, and backend applications, with **20M+ combined downloads**. Specialized in Kotlin, Jetpack Compose, and Kotlin Multiplatform on the mobile side, and Laravel, Node.js, and Firebase on the backend.

TECHNICAL SKILLS

- **Mobile:** Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP), Compose Multiplatform (CMP), Android SDK, Coroutines/Flow, Hilt/Koin, SQLDelight, Media3, FFmpeg
- **Backend:** Laravel/PHP, Ktor, Node.js, REST API design, WebSockets, GraphQL, Firebase
- **Data & Systems:** MySQL, Redis, C/C++
- **DevOps:** Docker, GitHub Actions (CI/CD), Fastlane, Linux, Nginx, Git
- **Also Familiar With:** iOS, SwiftUI, Swift, Java, Google Maps/MapBox, AdMob

PROFESSIONAL EXPERIENCE

Senior Mobile Developer | *DONE CORP* — 2026 – Present

- Engineered a food and grocery delivery “super app” using Kotlin Multiplatform and Compose Multiplatform (Android/iOS), with live order updates, GPS tracking, WebSockets, and Google Maps/MapBox integration.
- Developed the partner portal app that streamlines real-time store order management.
- Built the driver app for delivery dispatch, tracking, and logistics operations.

Professional Freelancer — 2021 – Present

- Delivered **40+ custom mobile and full-stack projects** for clients across the US, Europe, and Asia, consistently earning **5.0-star feedback** on Fiverr for clean architecture, reliable delivery, and clear communication.
- Architected and shipped apps end to end, from requirements and backend APIs to Play Store release.

  “Seller was proactive with the work, all tasks completed on time. He communicates very well and is adaptive to changes.” — Verified Client, Fiverr

  “The seller has completed the project successfully. He gives good support to fix the issue and bug revision.” — Enterprise Client, Fiverr

Web & Backend Foundations — 2020

- Built full-stack web applications, gaining a strong foundation in relational databases, REST APIs, authentication, and backend architecture.

FEATURED PROJECTS

- **JPEG Image Compressor & Resizer:** High-performance Android image compression and conversion app. Uses memory-safe Coroutines to process bulk high-resolution images without crashes on low-end devices. **1M+ installs, 4.5★ rating, <0.1% crash rate.** Play Store
- **DONE Super App:** Food and grocery delivery platform (Android/iOS) built with Kotlin Multiplatform and Compose Multiplatform, connecting customers, stores, and drivers with real-time tracking and shared business logic across platforms. Play Store
- **TTBoost:** Android app built with Jetpack Compose, Hilt, SQLDelight, and Ktor. Migrated the backend from Firebase to Laravel for better database control, flexible queries, and performance. Play Store
- **Video Resizer & Compressor:** Android video editor with a Jetpack Compose UI, using FFmpeg and Media3 for compression, trimming, and format conversion. Play Store
- **World VPN:** Android VPN app powered by OpenVPN, with a Compose UI, a complete custom backend, and AdMob monetization. Play Store

OPEN SOURCE

- **KEditor:** Kotlin Multiplatform video editing library powered by FFmpeg and Media3, enabling hardware-accelerated processing on Android and iOS. GitHub
- **LazyStaggeredGrid:** Jetpack Compose library for flexible staggered grid layouts. GitHub

EDUCATION & PROGRAMS

Low-Level Programming Student | *1337 Coding School (42 Network)* **2024 – Present**

- Project-based training in C/C++, low-level programming, and problem solving.

Program Participant | *UM6P Explorer* **2025**

- Completed a 3-month business accelerator program focused on turning ideas into market-ready projects.

Baccalaureate **2021**

- High school diploma.
